

Świnoujście, 2.04.2025

Zbroja Adwokaci sp. k. supported Alumare sp. z o.o. in an international dispute related to the construction of a ship with builder number 228 worth NOK 33,830,00 (PLN 12,496,802).

The case was highly problematic and required special skills in negotiation and shipbuilding contract law. Especially as the contracting party was not the buyer of the ship (a Norwegian company), but the intermediary (another Norwegian company). Additionally, the contract itself was based on Swedish law.

Due to the bankruptcy of the intermediary in Norway, it was necessary to start negotiations directly with the Norwegian buyer, in the course of the Norwegian bankruptcy proceedings.

As a result of the negotiations, we were able to reach a common position, with the assistance of the law firm, which allowed us to conclude the dispute without loss on our part.

The efficiency and commitment of the law firm to the most favourable resolution of the dispute is noteworthy. Also, the quality of the service at the interface of different languages and legal systems was a reason for our satisfaction.

We recommend law firm Zbroja Adwokaci as a competent partner in maritime matters.

Dariusz Wąs
